FASHION SHOWS

Timeless Boldness The Spring Summer 2025 collections showcased colorful accessories, from bags to shoes. While some brands revisited timeless colors with boldness such as pure immaculate white and deep black, others embraced dazzling color ranges inspired by primary colors, as if they had just stepped out of a tube of paint. In a color-block pattern, red, yellow and blue are, the key tones, alongside a bright green, which brings a touch of light to the summer collections. As a sign that environmental challenges are at the heart of our society's concerns, shades inspired by our biosphere are once again making their way onto the catwalks of luxury brands this season. From olive green to sandy tones, dark brown is becoming the new black essential to include in our wardrobe for summer 2025. In our latest Womenswear SS25 reports, we noted that transparency was a key edgy trend for ready-to-wear, and the same is true for accessories. Between half-hidden and half-seen, lines are blurring to shape minimalist and contemporary designs.

This forecasting report is based on Data extracted from 225 International fashion shows of NY, London, Milan and Paris with 52 000 products analyzed. The trends are organized by visibility (number of looks presenting the trend attribute) and the percentage shows the trend growth compared to SS24 fashion shows. Find the relating icons & stamps on the last slide.
